

A person wearing a green hoodie and a cap is standing in a lush forest, pointing their right hand upwards towards the trees. The forest is filled with green foliage and ferns. The scene is captured from a low angle, looking up at the person and the surrounding trees.

**FIGHT**

**THE BITE.**

# Freedom to explore

Out there is where it happens. Following a trail, climbing higher, staying out longer just to see what's around the next corner.

Reima BugProof is made for those moments. A full head-to-toe solution that helps keep mosquitoes and ticks from getting in the way, so kids can stay focused on what they're doing — not what's buzzing around them.

Light, comfortable pieces that work together: pants that cover the legs, socks that complete the barrier, tops and layers that let them move freely. Everything designed so they can head out and stay out.

No interruptions. Just time to learn, try, fail, and go again.

# Tell bugs to buzz off

## HEALTH FACTS

Insect-borne diseases account for more than 17% of all infectious diseases, causing more than 700 000 deaths annually.

## DISEASES CARRIED BY MOSQUITOES:

Zika, West Nile Virus, Malaria, Encephalitis (several types), Yellow fever, Dengue fever, and Chikungunya virus, for example.

## DISEASES CARRIED BY TICKS:

Lyme disease, Rocky Mountain Spotted Fever, Ehrlichiosis and Encephalitis.

## HOW TO STAY SAFE

Avoiding waters in the evenings and sleeping under a net are helpful against mosquitoes, but not enough for complete protection.

Ticks have lately become more numerous and you can find them everywhere, on city lawns, too. Wearing your socks over the pants legs slows ticks down when they're heading for your skin - they always climb upward.

Insect repellent sprays or lotions can help reduce the risk of insect bites. With the help of Reima BugProof wear, there's less need to spray your child's skin.

### PLANT-BASED PROTECTION

An outing in nature is a wonderful experience for kids - but with too many insect bites, it can easily become a troublesome one. Reima BugProof clothing gives you peace of mind, as it efficiently repels ticks and mosquitoes!

The repellence is thoroughly tested: On synthetic fabrics, it's still efficient after 50 washes. On cellulosic fabrics such as cotton, the durability is 30 washes.

BREATHABLE

REPELS INSECTS

### THE TECH EXPLAINED

The surface finish contains an efficient plant-based insect repellent. The mild lemonish smell of the finish is faint and pleasant to humans - actually, we use the active ingredient geraniol in perfumes and foodstuffs.

The finish is brought to market by Reseda Lifesciences, <https://resedalife.com/>.

## Tell bugs to buzz off

### A STOP TO CREEPY CRAWLIES

Light, elastic and comfortable socks - only better than usual! Easy protection against ticks lurking in the grass.

### HOW DOES REIMA BUGPROOF WORK?

Ticks and mosquitoes have one thing in common: they need our blood for reproduction. They sense their prey in various ways and attempt to approach our skin. This is easy for mosquitoes and even easier for ticks, as in their nymph stage they can be almost too small to be seen.

Plant-based geraniol in the finish is toxic to insects, so ticks and mosquitoes won't stay on the fabric but will avoid it. The finish is biodegradable.

**FROM HEAD TO TOE,  
READY TO GO**

Reima BugProof clothing helps keep insects at bay, so kids can enjoy the outdoors more comfortably. For the best protection, it's important to cover exposed skin: use socks pulled over leg ends, pull up hoods, and tuck the shirt into the pants to keep little explorers fully covered and ready for adventure.

5300164G INSECT SOCKS

## Reviews from happy BugProof users

★★★★★

They protect the legs well from insects, are cool to wear, and can easily be converted into shorts even in the car if needed. Our go-to trousers for summer trips when we don't know where we'll end up.

★★★★★

Versatile trousers. Light, comfortable and loose-fitting. Suitable both for mushroom picking in the forest and for the city. The legs are easy to remove, and the zippers stay hidden under the fabric, so they look neat also as shorts.

★★★★★

Keeps its promise. My children didn't get any ticks or mosquito bites, and the socks are also very comfortable."

★★★★★

Highly recommended. I bought the BugProof socks for myself and my child to try out. We've used them for a week now, and there haven't been any mosquito bites on our ankles even though there are plenty of mosquitoes at the cottage. The socks are also comfortable to wear and stay on well, even on slim feet. A big recommendation."

★★★★★

Looks great. I don't know if it truly works or if it's just a coincidence, but at least I haven't seen any bugs walking on the shirt. We wander in the forest weekly wearing this shirt and trousers treated with the same substance. There are ticks in the area. Fits Reima's normal sizing – slightly large, but since I chose size 92, which my child normally wears, the shirt can be used all summer and early autumn.

★★★★★

My kid loves the design.

★★★★★

Light and soft. Very comfortable against the skin. The hood protects effectively from insects. Also breathable in warm weather (tested on an African safari).

★★★★★

I recommend it. Pleasant against the skin.

★★★★★

Light and provides good coverage based on the fitting. The sleeves were surprisingly long, but it didn't matter since the cuffs are snug.

★★★★★

Beautiful color and fabric, ideal to use even in warm weather.

Reima BugProof wear  
stops the buzz and  
starts the adventure.
